

CombLas

More than 20 lasers in 1

- Photonic Micro-Cell based Raman wavelength convertor
- Ruggedized packaging
- Long life-time
- Ultra-low pump threshold
- Compatible with most pulsed lasers

Output spectrum with example of bio-photonic application

- Battery powered
- UV-VIS spectral coverage (over 20 lines)
- Single mode
- Ideal for bio-photonic applications

Optical Properties*

Pump wavelength	532 nm
Spectral coverage	350-800 nm
Line spacing	17.6 THz
Average output power	9 mW
